Description

In user's profile page, we can know the user's activity and numbers of reported issues.
I think it would be great if we can know not only the number of reported issues but also a list of reported issues.

This patch adds a link to reported issues on user's profile page.

In addition, this patch provides a means to get a list of issues reported by non-members. Because they are not listed in drop-down in issues filter, there is no means to get a list of issues reported by non-member. With this patch, we can get the list in some clicks.

why you don't use widget for "My page"?

Thanks for the comment.
On "My Page", I can see **MY** reported issues but cannot see **YOUR** reported issues.

For example, It is not so easy to see someone's reported issues on www.redmine.org. Most users except "Contributers" are in the "Non member" role, they cannot be seen in "Assignee" filter.
