Resolution:	Fixed		

Description
When I need to export the issues, sometimes I only want to pick out some of the issues to export. I know the filter can do this but could I just simply check the issues in the list then export?

- Category changed from PDF export to Issues filter

- Status changed from New to Closed

- Resolution set to Fixed

You can use the "Issue" filter which can filter issues by ids. It was implemented by #4806 (Redmine 3.3.0).
