

Redmine - Defect #19590

Parent not visible unless 'Edit' is clicked

2015-04-10 17:09 - Brian Bouterse

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.3
Resolution:			
Description			
0) Create a task A, and a task B. 1) Click Edit on Task B and set the task ID to the ID of task A. Save. 2) Observe that task A shows task B as a SubTask 3) Observe that the normal (not 'edit') view of Task B gives no indication that it has its parent id set. 4) Click edit on task B and you can see parent ID set. I expect that if a parent ID for a task that it is visible in some way.			

History

- #1 - 2015-04-10 17:10 - Brian Bouterse
- The last sentence should read. "I expect that if a parent ID for a task is set, that it is visible in some way without clicking 'Edit'."
- #2 - 2015-04-10 17:23 - Barnaby Court
- +1 this would be very helpful!
- #3 - 2015-04-10 17:48 - Brian Bouterse
- After much more searching we discovered that over the issue title, any parent task titles are also shown in tiny font. This is a UI issue then because that is not a good place for that info. The parent ID is a field like all other fields, so I expect it is shown as a field, near all the other fields.
- #4 - 2015-04-15 15:29 - Gabe Ayers
- I think this issue should be set as resolved since you found where the parent task is. Or the issue should be updated to request a change in location of the parent task.
- #5 - 2015-04-15 17:27 - Brian Bouterse
- Status changed from New to Resolved
- I'm not totally happy with the UI representation, but it does work and I don't think adding more fields is a large improvement. I'm marking the issue as resolved.
- #6 - 2015-05-09 10:08 - Toshi MARUYAMA
- Status changed from Resolved to Closed
