Redmine - Feature #19592

Public/Private or Anonymous/Authenticated/Team access attribute for each project module

2015-04-10 22:53 - George Notaras

Priority: Normal Due date: Assignee: % Done: 0% Category: Project settings Estimated time: 0.00 hour Target version: Estimated time: 0.00 hour Target version: Project settings Image: Comparison of the set of time in the set of tin the set of time in t	Status:	New	Start date:		
Category: Project settings Target version: Estimated time: Resolution: 0.00 hour Description It would be useful to be able to further restrict access to each project module, in addition to the general permission settings. One way could be a Public/Private attribute which would translate to Anonymous/Authenticated access. IMHO the ideal access attribute would be Anonymous/Authenticated/Team per project module. Related issues:	Priority:	Normal	Due date:
