Redmine - Defect #19602

Non-Reporter role cannot see issue list

2015-04-13 11:02 - Huynh Duy

Status:	Needs feedback		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues permissions		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	2.6.5

Description

I have upgraded Redmine from 2.2.2 to 3.0.1. I do step by step as http://www.redmine.org/projects/redmine/wiki/RedmineUpgrade guide. Everything is ok but when I login by my account (with role 'developer') I cannot see an issue list but I can see an issue detail. Then I logout my developer account and login by another account (role 'reporter'). In reporter-account I can see the issue list. I try to assign new task to my developer account but it still doesn't work.

I have changed something such as: I copied 'reporter' role and set its to my developer-account, or changed my developer-account to others role, but not anything changes except 'reporter' role, it's still not show the issue list.Finally I have changed my config to show sql query, I execute this query and it return many data rows.

My environment
CentOS 6.6 (Final)
Environment:
Redmine version   3.0.1
Ruby version   1.9.3
Rails version   4.2.0
Environment   production
Database adapter   SQLite
Subversion   2.2.2
Redmine plugins:
redmine_better_gantt_chart
redmine_mentions
redmine_flowdocks

Redmine plugins:

    redmine_better_gantt_chart
    redmine_mentions
    redmine_flowdocks

#2 - 2015-05-10 14:33 - Toshi MARUYAMA

- Status changed from New to Needs feedback

- Priority changed from Urgent to Normal

You use Redmine 3 incompatible plugins.
Try without plugins.

#3 - 2015-05-26 08:57 - Jayen Ashar

here's what we've tried in redmine 3:

- changing the 'developer' role's permissions to match the 'reporter' role's permissions (through the admin web interface)
- changing the 'developer' role's workflows to match the 'reporter' role's workflows (through the admin web interface)
- removing all plugins
- changing the 'developer' role's permissions to match the 'reporter' role's permissions (with sql (move_issues was still there from an old redmine))
- copying the 'reporter' role to a new role (users with the new role can't list issues)

we've just tried redmine 2.6.5 with no plugins and have the same issue. we'll see if we can pinpoint exactly which version we start having problems with.

#4 - 2015-06-24 14:58 - Toshi MARUYAMA

- Status changed from Needs feedback to New

#5 - 2015-06-24 14:59 - Toshi MARUYAMA

- Target version set to 2.6.6

- Affected version changed from 3.0.1 to 2.6.5

#6 - 2015-06-29 18:30 - Jean-Philippe Lang

- Assignee set to Toshi MARUYAMA

Toshi, were you able to reproduce ? I'm not.

#7 - 2015-06-30 06:41 - Toshi MARUYAMA

- Status changed from New to Needs feedback

- Assignee deleted (Toshi MARUYAMA)

- Target version deleted (2.6.6)

In 2.6.5 I enabled only "Move issues" on "Issue tracking" role,
I cannot reproduce.
But, I found another issue (#20206).

#8 - 2015-07-25 12:39 - Toshi MARUYAMA

- Related to Defect #20206: Members w/o view issues permission are able to list issues on public projects if the non member role has the permission added
