Target version:	3.0.2		
Resolution:	Fixed	**Affected version:**	3.0.1

Description

The problem occurs when the issue tracker is changed to another which does not have the estimated time field activated:

- Create a main issue with a tracker which has the "Estimated time" field
- Create a subtask with a tracker which has also the the "Estimated time" field and set it to X hours
- Change the tracker of this subtask to another which does not have the the "Estimated time" field activated
- Go to the parent task

Result: Estimated time on the parent task is still X hours

From my searches, I can see that the issue estimated time is not changed in DB. It won't change to null, but remain to X hours.

Merged r14180 (#19606).

History

#1 - 2015-04-14 10:36 - Stephane Evr

I had a deeper look into the code, I think that the method to patch is
tracker=(tracker) in app/models/tracker.rb where in case the new tracker does not have the Estimated Time field activated, we nullify the estimated time of the issue.

- File issue_tracker_estimated_time.diff added

I have put this simple patch to the method mentioned above.
This seems to resolve the problem so far
