<b>Target version:</b>		<b>Affected version:</b>	3.0.1
<b>Resolution:</b>	Duplicate		
<b>Description</b>			
<p>Hello,</p> <p>I'm using Redmine 3.0.1 that has Wiki pages as the follow:</p> <p>wiki.gif</p> <p>After upgrading from 2.6.x to 3.0.1, it occurs "Internal server error" when I click "red arrow" pages of image. The title of those pages include "Korea character" in common.</p> <p>There are no problem when clicking Wiki pages of only "English character".</p> <p>I think all 2-byte characters also have the same issue.</p> <p>Thanks, Harris.</p>

- Status changed from New to Needs feedback

Do you use windows bitnami?

#### #2 - 2015-04-13 18:02 - Harris Byun

Yes, I use on Windows bitnami.

Do I need to set more? or Is it only a problem on windows bitnami?

#### #3 - 2015-04-13 18:20 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

- Resolution set to Duplicate

Duplicate of #19321.

Please ask bitnami team.
