

Redmine - Defect #19700

User not in a specified public project could add issues to the project

2015-04-24 05:38 - icdc user

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>We use Redmine to set up a project management website. And now we encounter a problem, maybe the concepts are obscured.</p> <p>We create a public project P, and user A is not in this project. When user A logins in, he could view project P, which is understandable.</p> <p>But we find user A can also add issues to project A without any authority.</p> <p>Is this a bug? Or should we change project P to a private one? Thank you!</p>
