

Redmine - Defect #19702

Change of "Host name and path" after installation has no effect

2015-04-24 13:00 - Anonymous

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	3.0.1
Resolution:	Invalid		
Description			
After installing `redmine` (git tag 3.0.1) following the [installation instructions in the wiki](http://www.redmine.org/projects/redmine/wiki/RedmineInstall) changes to the "Host name and path" setting of the instance started with `bundle exec ruby bin/rails server webrick -e production` don't have any effect, so that there's no way to make the instance available from a remote machine. It is unclear whether usage of "Passenger (aka mod_rails), FCGI or a Rack server" is necessary for that or just an option to accelerate the setup.			

History

#1 - 2015-04-24 13:16 - Toshi MARUYAMA

- Category deleted (Wiki)
- Status changed from New to Closed
- Resolution set to Invalid

"Host name and path" is for link in mail sent from Redmine.

#2 - 2015-04-24 13:17 - Anonymous

Then it's completely unclear how to make an instance available from a remote machine.
