Resolution:	Fixed			

Description

When creating news items - it would be really nice to be able to directly attach images (or possibly other file types...) to the news item.

Just having the same **Choose file** button as on issue & wiki pages would do the trick!

Currently we are using a wiki page to contain images, that can then be referred to in News items.

Related to the above, RSS feeds seem to strip out image files... now this might be due to the workaroundish way in which we're doing this.
