

Redmine - Feature #1978

Hide paragraph terminator at the end of headings

2008-10-01 15:52 - Brian Ericson

Status: Closed	Start date: 2008-10-01

Target version:	
Resolution: Cant reproduce	
Description	
<p>Just upgraded to version 1921 and noticed the "backwards P with the vertical line doubled" (the paragraph terminator word processors will show in certain modes) at the end of every header line (h1, h2, and h3). At first, I thought something broke when I upgraded and immediately looked at the wiki source to see if I could undo this. Then I noticed this is supposed to be a link.</p> <p>These symbols are too prominent and distracting. I see now ([[FAQ]]) that your version for this site shows this symbol only when your mouse is over the header line, can we go back to that?</p>	

History

Note! This only affects the "Alternate" theme.

Just switched to the "Default" theme and noticed the toc looks fine there.

This, uh, appears to have fixed itself. Sorry.

#3 - 2008-12-07 15:14 - Jean-Philippe Lang

I seem to have the same issue as well. All my headings are ending with the Paragraph terminator.

What could be the cause?

#5 - 2009-04-03 09:16 - Roy New

Similarly with Brian, the terminator disappears by itself.

Seems like you have to wait awhile after you change a theme before it will get back to normal. Weird.

#6 - 2009-11-11 04:38 - Brad Rushworth

These reporters have both stated this issue is resolved.

However, a related problem is found in #4194.
