Description

Redmine has all information to draw activity graphs for a project. It would be the same as
current "/projects/activity/<name>" but using a graph. The X axis would represent time. Ideally there could be

- one line/graph for each kind of activity (tickets, wiki, news...) the use could select what is displayed
- a 'total' graph summarizing it all

And, in a perfect world, it would even be possible to compare activity of different projects on the same graph :)

History

#1 - 2008-10-02 01:53 - Thomas Capricelli

Somehow related to [#1517](#), but why restric oneself to trackers ? :)

#2 - 2009-12-03 21:56 - Thomas Capricelli

This project (of mine) kind of provide 'activity' for mercurial repositories.
http://labs.freehackers.org/projects/hgactivity/wiki

The code is available. I'd be happy to port this to redmine and to display activity for all 'sources' (commits, news, forums, wiki...), but i know nothing
about ruby or rails. Despite this, i would be happy to help.

+1. This would be interesting to see.

#4 - 2013-04-09 16:29 - Fernando Hartmann

+1 really nice
