

Redmine - Defect #198

id sequence fails after trac import

2008-01-23 14:36 - Panta Rhei

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description after a trac import adding a new issue failed cause the 'issue_id_seq' started at 1 albeit the id 1 was taken by the import. would be a bigger problem if the imported trac tickets are starting at 4000 eg. 4000 new tickets will be ok in redmine. ticket 4001 breaks the app. setting the correct nextval in the db fixed the issue. i'm using postgresql. but i think is an db independent problem.

but i think is an db independent problem.

No. It works fine with mysql.
But I'll try to find a solution to this problem.

#2 - 2008-01-23 15:13 - Panta Rhei

No. It works fine with mysql.
But I'll try to find a solution to this problem.

Ok. Great news. Thx for all your work. :)

#3 - 2008-01-23 17:35 - Jean-Philippe Lang

Fixed in [r1099](#). The sequence is now properly updated when using postgres.
