We need syntax highlighter plugin for C/C++. Someone recommends ultra_violet plugin. But we experienced system hangup only after installation of ultra_violet. It seems not match with current Redmine. How can I get good syntax highlighter for C/C++?

System hangup means MySQL is down while start up.

```c
#include <stdio.h>

int main()
{
    return 0;
}
```

```java
public class redmine
{
    const static int = 0;
};
```
