Description
Since the SVG stays the same size, it gets rather cramped in there. I hacked the source code to get it to be flexible if there's more than a certain number of people contributing, then it does some math to make it longer. I'm sure it's not very good, but at least it's something :)
Note: I'm somewhat of a n00b to rails, so I'm sure it's not done the "right way"(c)(tm)(r)
