<b>Description</b> Currently it's possible to have a main project and multiple sub projects. With this setup it's possible to map e.g. a Maven projects structure with it's modules, but it could be very interesting to have more levels. Things like a sub-sub-project etc. Could someone explain if there are any plannings about this or may be give some reasons why it is not planned?			
<b>Related issues:</b> Is duplicate of Redmine - Feature #594: Remove limit on subproject nesting <div>Closed2008-02-03</div>
