Resolution:	Invalid		**Affected version:**	

Description

Hi,
I was getting 422 Authentication error when i was editing journal/comments so i posted my question here

http://stackoverflow.com/questions/30387156/redmine-auth-token-missing-when-editing-comment

Then I run rake tmp:cache:clear and now i can't even logged in

        ruby 2.1.5p273 (2014-11-13 revision 48405) [x86_64-linux]

production.log

Processing by AccountController#login as HTML
Parameters: {"utf8"=>"□",
"authenticity_token"=>"wsQnpXOapy2ihefrjstSWVU1g8iIVrlFAnaP7wYuV4rK/wf+71adTDxM4GkZl/mSsaFPAHNmjXdtX1T/oJBz8w=
=", "back_url"=>"http://redmine.redbrick.io/", "username"=>"s", "password"=>"[FILTERED]", "login"=>"Login »"}

Can't verify CSRF token authenticity
Rendered common/error.html.erb within layouts/base (0.7ms)
Filter chain halted as :verify_authenticity_token rendered or redirected

Runing With apache2 fastcgi, only one instance.

I installed 1 plugin Agile before running rake tmp:cache:clear

You need to restart web server.

#2 - 2015-05-22 06:22 - Abdullah Bashir

I did it many times but same issue

I read that if you want information then it's below and if you want me to see something else then what's that?

Environment:
Redmine version   3.0.0.devel
Ruby version   2.1.5-p273 (2014-11-13) [x86_64-linux]
Rails version   4.2.0
Environment   production
Database adapter   Mysql2
SCM:
Subversion   1.6.17
Git   1.7.10.4
Filesystem
Redmine plugins:
no plugin installed

Thanks

Why do you use "devel"?

> Ruby version   2.1.5-p273 (2014-11-13) [x86_64-linux]
> Rails version   4.2.0

Old.

Really? You said Agile plugin.

#6 - 2015-05-22 06:53 - Abdullah Bashir

I removed the folder from plugin to see if that's an issue but still no success. I never used that plugin just extracted it in plugin ran rake tmp:cache:clear as nothing was showing in Admin-> plugin and now i can't login.

Redmine version 3.0.0.devel I cloned master branch so i never checked out to any version. can you tell me what version should i use?

#7 - 2015-05-22 07:18 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

- Resolution set to Invalid

Closed because you use in abnormal way.
Please use forum for questions.

You need to run db:migrate if plugin has db migrate.

I never used that plugin just extracted it in plugin ran rake tmp:cache:clear

You need to run "rake tmp:sessions:clear", too.

as nothing was showing in Admin-> plugin and now i can't login.

Redmine version 3.0.0.devel I cloned master branch so i never checked out to any version. can you tell me what version should i use?

You should use stable.

You need to run db:migrate if plugin has db migrate.

I never used that plugin just extracted it in plugin ran rake tmp:cache:clear

You need to run "rake tmp:sessions:clear", too.
