

Redmine - Defect #19947

Browse repository in sub projects

2015-05-26 15:50 - Frederic Cand

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
It is currently (3.0.2) impossible to browse a repository in subprojects, whereas it is possible to refer to changesets in subprojects (in wiki pages, issues, etc).			
Example :			
<ol style="list-style-type: none">1. setup project "A" with repository "R"2. setup project "B", under project "A", without a repository3. go to project "A", you have the "repository" tab4. go to project "B", you don't have the "repository" tab, but you can refer to a changeset of the repository "R"
