<b>Description</b> Within the Issue area it's possible to store a configured report under a self defined name. It would be nice to have the same feature in the Time-Tracking area. For example a developer can create once a weekly report to get information about the effort for a particular week whereas a project manager can create a report about the efforts during the month to get an overview about the used budget or other things. This might be enhanced to reports about all projects.			
<b>Related issues:</b> Is duplicate of Redmine - Feature #995: Add ability to save reports <span>Closed</span> <span>2008-04-04</span>
