Category: Custom fields	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
Steps to reproduce	
<ul style="list-style-type: none">• create projects hierarchy• create versions shared with project tree• create a custom field attached to issues, type version, attached to a tracker of one of the above project• create a new issue	
Actual result	
<ul style="list-style-type: none">• whereas shared versions are grouped by projects in "target version" field, versions in custom field are flat (if some versions are the same in different projects, they are displayed indistinctly)	
Expected result	
<ul style="list-style-type: none">• shared versions in custom field should be either prefixed with project name, or grouped by project name; just like for "target version"
