Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
<p>We are operating in an environment which requires the use of client-side certificates for users to authenticate (LDAP over SSL). There were two plugins previously created that do not work with Redmine 3.x or do not have the required functionality. I am attempting to support this for a major corporation in a DevOps environment.</p>			
Environment:			
Redmine version 3.0.1.stable			
Ruby version 2.2.0-p0 (2014-12-25) [x86_64-linux]			
Rails version 4.2.0			
Environment production			
Database adapter MySQL2			
Apache Server version: Apache/2.2.15 (Unix)
