Target version:		Affected version:	
Resolution:			
Description			
Hello,			
Create a custom field visible to role "x", assign it to a tracker and a project. In workflow, Field permission for the role update the field permission to required only in the second or third status. (leave blank in the first one)			
Now in the project, Create a new issue, with the role as assigned above. Check that the custom field is not mandatory in the first status. Change the status to the second one.. Check that during this status we had made the field mandatory which is not reflected in the form.			
Please let me know if you need additional info. Thanks.

- Status changed from New to Needs feedback

Do you use plugins?

#5 - 2015-08-01 15:57 - Rupesh J

Yes.! I have some plugins.
Developed by me and some got from Plugins section.!

#6 - 2015-08-31 01:38 - Toshi MARUYAMA

I cannot reproduce on clean Redmine [3.0.4](#).
