**Description**

Hi

I need to create issue by email.

So I run command line as a below .
rake -f /opt/redmine-3.0.2-0/apps/redmine/htdocs/Rakefile redmine:email:receive_imap RAILS_ENV="production" host=imap.gmail.com username=xxxxxxx@gmail.com password="xxxxxxx"

But I got error message ,as a below ====================================
rake aborted!
LoadError: cannot load such file -- application
/opt/redmine-3.0.2-0/apps/redmine/htdocs/plugins/redmine_local_avatars/lib/users_avatar_patch.rb:1:in `<top (required)>'
/opt/redmine-3.0.2-0/apps/redmine/htdocs/plugins/redmine_local_avatars/init.rb:3:in `<top (required)>'
/opt/redmine-3.0.2-0/apps/redmine/htdocs/lib/redmine/plugin.rb:155:in `block in load'
/opt/redmine-3.0.2-0/apps/redmine/htdocs/lib/redmine/plugin.rb:146:in `each'
/opt/redmine-3.0.2-0/apps/redmine/htdocs/lib/redmine/plugin.rb:146:in `load'
/opt/redmine-3.0.2-0/apps/redmine/htdocs/config/initializers/30-redmine.rb:21:in `<top (required)>'
/opt/redmine-3.0.2-0/apps/redmine/htdocs/config/environment.rb:14:in `<top (required)>'
Tasks: TOP => redmine:email:receive_imap => environment
(See full trace by running task with --trace)
