

Redmine - Defect #20173

Issues of private projects show up in the public rss feed.

Target version:		Affected version:	3.0.3
Resolution:	Invalid		
Description			
Hey,			
issues within a private project show up in the "all ticket" rss feed. This is insanely critical for me as there is privacy related data being stored. I had to disable the feeds (rss, csv, pdf) in order to avoid abuse for now, but heavily used those features. :(
