

Redmine - Patch #20180

Make the updateIssueFrom(url) function return the XMLHttpRequest object

2015-06-26 14:33 - Vincent Robert

Status:Closed

Priority:Normal

Assignee:Jean-Philippe Lang

Category:Code cleanup/refactoring

Target version:3.1.0

Start date:

Description

The current javascript function updateIssueFrom(url) does not return anything.
If we could just return the XMLHttpRequest object (as it is returned by the ajax() call), it would allow us to chain methods like this:

```
updateIssueFrom(url).done(function() {  
  $( this ).addClass( "done" );  
});
```

Here is the patch:

```
diff --git a/public/javascripts/application.js b/public/javascripts/application.js  
--- a/public/javascripts/application.js  
+++ b/public/javascripts/application.js  
@@ -471,7 +471,7 @@ function updateIssueFrom(url) {  
    $('#all_attributes input, #all_attributes textarea, #all_attributes select').each(function(){  
      $(this).data('valuebeforeupdate', $(this).val());  
    });  
- $.ajax({  
+ return $.ajax({  
   url: url,  
   type: 'post',  
   data: $('#issue-form').serialize()
```

This simple patch could really help me to simplify my Redmine plugins. Thank you.

- #3 - 2015-08-24 18:12 - Etienne Massip

FTR the object returned by the function is not a XMLHttpRequest but a Promise.
