Category: REST API	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
<p>For serial migration from another PM system (or master-master integration) I suggest add ability to set dates for issues and their logs\journals in the past on the create/update issue methods, and in the issue journal update through REST API</p> <p>What i mean ? For example:</p> <pre>POST /issues.xml <?xml version="1.0"?> <issue> <project_id>1</project_id> <subject>Example</subject> <priority_id>4</priority_id> <created_at>2001-01-01</created_at> </issue></pre> <p>Or similar like X-Redmine-Switch-User (setting it in HTTP Headers)</p> <pre>X-Redmine-Override-Session-TimeStamp: 2001-06-27T17:18:26Z</pre>
