

Redmine - Feature #202

Textilization of Documents, News and Timelog-entry comments

2008-01-25 17:19 - Warren Harris

Resolution:	
Description	
I've noticed another missing textilization: Under projects/list_documents page, documents are listed with a preview of their descriptions. However, the descriptions are not textilized. When the description is shown under the documents/show page, it is correctly textilized.

Associated revisions

Revision 3602 - 2010-03-18 21:02 - Jean-Philippe Lang

Adds text formatting to documents index (#202).

History

#1 - 2008-01-25 17:29 - Warren Harris

Here's another one... seems like there's no reason the news summary shouldn't also be textilized. (patch included)

#2 - 2009-11-22 20:54 - Mischa The Evil

- Category set to Text formatting

Just a bump on the issue. Plus is seems slightly related to issue #3740.

#3 - 2009-11-22 20:59 - Mischa The Evil

- Subject changed from another missing textilization to Textilization of Documents and News

Changed subject only.

#4 - 2009-11-22 20:59 - Mischa The Evil

- Tracker changed from Defect to Feature

#5 - 2009-11-22 21:32 - Mischa The Evil

```

Except that syntax-highlighting isn't working in that specific case: see issue #3740.

#6 - 2009-11-22 22:34 - Mischa The Evil

- File `textilize-document-description_r3084.patch` added

- File `textilize-news-summary_r3084.patch` added

- File `textilize-timelog-entry-comment_r3084.patch` added

- Subject changed from *Textilization of Documents and News* to *Textilization of Documents, News and Timelog-entry comments*

I'll make a summary of several different changes regarding proposals to render content as being "textilized":

1. I'll start with the initial request: At the documents page (at <http://host.domain.tld/projects/projectfoo/documents>) documents are listed with a preview of their descriptions. However, the descriptions are not textilized.

When the description is shown under the documents/show page (at <http://host.domain.tld/documents/1>), it is correctly textilized.

(patch; attachment:code:textilize-document-description_r3084.patch)

2. Later on in the journal of this issue the textilisation of the news **summary** is also proposed and patched.

(patch; attachment:code:textilize-news-summary_r3084.patch)

3. I've now also merged issue #221 into this issue. It's basically a simple request to render the timelog-entry comments also textilized.

(patch; attachment:code:textilize-timelog-entry-comment_r3084.patch)

I've rebased all three patches against the latest trunk and attached them to this issue. I'll close/update issue #221 as being a (partial) duplicate of this issue (patch #221 does some more than what the issue's description says, which is only textilisation of the timelog-comment).

Can a Redmine Lead decide which of the patches will be implemented (in future) and decline the ones that aren't get integrated?

[...]

Can a Redmine Lead decide which of the patches will be implemented (in future) and decline the ones that aren't get integrated?

My personal proposal would be to only merge the patch for number 3. That one seems to provide the most useable UI-enhancement with a small change without any unwanted side-effects.

Number 2 seems to have a slight side-effect on the project-overview block and the news index view where trailing new-lines are added. Number 1 seems a good start considering related issue #3740 but therefore also seems to have a higher severity when integrating it in the current state of Redmine (before 0.9 feature freeze).

NB: With all these patches there exists a chance that the users enter comments with markup which /could/ make the UI break. It should be handled with care. This might also be a good reason to decline all off the three patches...

#8 - 2010-03-18 21:02 - Jean-Philippe Lang

Text formatting on documents index added in r3602.

#9 - 2010-03-19 15:49 - Gustavo Gama

- File *long_and_textilized_time_entry_comments.patch* added

I'm attaching a improved (imho) version of Micha's third patch (the one that deals with time entry comments).

It 'textilizes' time entry comments **and** removes the length restriction. Also, the form `text_fields` to enter the time entries were replaced by `text_areas`'s.

Not missing on present day.

News are textilized

time entry comment are not textilized

Not missing on present day.

I've updated #8668 accordingly. Thanks for mentioning it.

Ivan Cenov wrote:

News are textilized

News items are indeed textilized, but not the news summary.

#13 - 2013-04-10 09:34 - Dipan Mehta

+1. This is very useful.

When is this likely to be fully accomplished?

#14 - 2016-08-23 13:15 - JW Fuchs

+1

Textilization in the above mentioned areas would be helpful.

#15 - 2016-12-29 23:04 - Marius BALTEANU

- File textilization_for_spent_time_comments.patch added

The attached patch adds textilization to spent time comments also.

#16 - 2017-03-08 21:44 - Marius BALTEANU

Having textilization support for spent time comments is quite useful. Please let me know if tests are required for my patch.

#17 - 2017-11-08 14:23 - Dipan Mehta

The document and news already seems to have textilization support as it seems. Don't know since when though!

Can we also complete the last part as well?

Second oldest unresolved issue by now.

#18 - 2021-12-24 01:51 - Go MAEDA

- Target version set to *Unplanned backlogs*

#19 - 2022-06-01 09:05 - Takenori TAKAKI

- File *textilization_for_spent_time_comments_with_test.patch* added

+1 Textlization of the spent time comments would be very useful.

I confirmed that the patch posted by @Marius in #202#note-15 works with the latest version of trunk (r21619).

I made a patch with a little bit refactoring and additional test code, and attache it.
