Redmine - Defect #20273

Custom Queries - Group By Custom Columns

2015-07-08 22:42 - Bala Sridaran

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Administration	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	2.5.2

Description

Currently we have the below version installed and as per the revision mentioned on other similar issues - r10073 which has addressed this issue already part of older redmine releases.
But this feature of grouping by custom fields does not seems to be working on the below version. Let us know the solution.

```
===========================
Environment:
Redmine version              2.5.2.stable
Ruby version                 1.9.3-p545 (2014-02-24) [i386-mingw32]
Rails version              3.2.19
Environment              production
Database adapter          PostgreSQL
SCM:
Subversion              1.8.10
Git            1.9.2
Filesystem
Redmine plugins:
no plugin installed
```

History

#1 - 2015-07-09 01:04 - Mischa The Evil

- Status changed from New to Closed

- Priority changed from Urgent to Normal

- Resolution set to Invalid

A proper defect report should at least give a **detailed** description of the *expected* and actual *experienced behavior* that is considered a defect, along with the stack trace(s) of the request(s) that produce the unexpected application behavior from the logs.
The quote above by far does not meet these requirements. Instead, it reads like a - bit demanding - support request.

Please don't use issues as a disguised support forum. For such, we have the dedicated Help forum.

Regards,

Mischa.
