Redmine - Patch #2029

New option that makes emails plain text.

Target version:	0.8			

Description

This patch add a new option to system-wide configuration. If the option is enabled, emails that redmine sends become text/plain.

Some of archaic hackers --for example, the ruby core team-- still hate HTMLs in email. So ruby issue tracking system needs this feature.

+1, it is nice to have an option for that.

#2 - 2008-10-16 07:46 - James Turnbull

This is a great feature - it's something we've been after for a while - be nice if this was a per user feature - some of our users would prefer HTML and some plain text.

I've commited the patch with slight modifications in r1932.

For the moment I've no time to add a per user option.

James, per user setting is not that simple since a single email is sent for all the notified users.
I close this ticket since the patch is committed but feel free to submit a feature request :-)
