Target version:				
Resolution:			**Affected version:**	

Description

An anonymous user can see all projects a member participates in, even if they are private and should not be visible at all.

History

#1 - 2008-01-27 13:07 - Nils Adermann

Oh and I'm using 0.6.3

#2 - 2008-01-28 13:14 - Jean-Philippe Lang

This is fixed in trunk (r1036) and in the 0.6-stable branch.
So, it will be fixed in the next release.

#3 - 2008-01-28 14:46 - Nils Adermann

Alright, only updating account_controller.rb to 1036 didn't change anything, so is there any documentation on how to move from trunk r1010 to the 0.6-stable branch? Couldn't find anything in the wiki.

#4 - 2008-01-28 14:58 - Nils Adermann

Simple svn switch did the job, it's working in 0.6-stable now, thanks.
