</tbody>
</table>

Description

I think it would be interesting to be able to use both functionality:

- Use the issues field
- Use the issues status

I would like to use the issues status to set at 0% new tickets and at 100% closed tickets. But I want for example to leave the choice for others status (use issue field).

History

It's a feature, sorry. I can't modify tracker field.

#2 - 2015-07-23 17:07 - Toshi MARUYAMA
- Tracker changed from Defect to Feature
