

Redmine - Defect #20403

error_no_default_issue_status

2015-07-24 15:35 - sugimoto m

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	3.0.4
Resolution:	Invalid		
Description I installed redmine redmine-3.0.4-1 and the database copied from old one. I confirmed the old tickets is able to list on new redmine. However,on new redmine I can't create new ticket with error_no_default_issue_status. In addition, I can create new tickets as copy from old ticket, but I can't select other statuses. I investigated MySQL table "issue_statuses", I found there is not "is_default" field that old redmine has. So, I guess that is the cause, but I can't resolve it. How do I resolve it?			

History

#1 - 2015-07-24 15:48 - Toshi MARUYAMA

- Status changed from New to Closed
- Resolution set to Invalid

I think you use bitnami.
Please contact bitnami team.

I investigated MySQL table "issue_statuses", I found there is not "is_default" field that old redmine has.
