Description

The files tab is a nice mechanism to provide any compiled artefacts by version. Unfortunately there is no REST-API support for at least downloadig (uploading would be perfect). e.g.

file list in that project from version_Id=3

```
GET /projects/redmine/files?version_id=3
```

get file with id

```
GET /projects/redmine/files/123
```

get file with name

```
GET /projects/redmine/files/redmine.jar
```

get file with name from version

```
GET /projects/redmine/files/redmine.jar?version_id=3
```

Is duplicate of Redmine - Feature #7725: REST API for files	**Closed**	**2011-02-25**

History

#1 - 2015-07-24 21:29 - Heiko Robert

Maybe easier to implement to reuse the logic from the page:

```
GET /projects/redmine/files.xml

GET /projects/redmine/files.xml?version_id=123
```
