**Description**

Hello,

Redmine version          3.0.3.stable
Ruby version             2.2.1-p85 (2015-02-26) [x86_64-linux]
Rails version            4.2.1
Environment              production
Database adapter         Mysql2

- On a tracker, disable the asignee field.
- Create a issue category and set assignee to a user.
- Create a new issue and assign the above created category.
- check that the assingee is updated with the above even when the tracker has been disabled with the field.

*- Status changed from New to Needs feedback*

Do you use plugins?

**#2 - 2015-08-01 15:57 - Rupesh  J**

Yes.! I have some plugins.
Developed by me and some got from Plugins section.!

Feedback :
In my redmine,
I create projet Shope and tracker Order.
I add two new members : Paul and phillips. They are a rôle with all permissions.

For a tracker Order,
_I disabled the assignee field and others fields
_I keep only category field.

In my project Shope,
_I able tracker Order.
_I add Paul and Phillips.
_I create two category : Seller and Buyer. I add Paul in Buyer category and Phillips in Seller.

Scenario :

Paul create a issue Order "Beer", in project Shope, with category Seller.
In "My page" of Paul, you can see issue "beer" in Reported issues.
In "My page" of Phillips, you can see issue "beer" in Issue assigned to me.

Paul upgrade a issue Order "Beer", in project Shope, with category Buyer.
In "My page" of Paul, you can see issue "beer" in Reported issues.
In "My page" of Phillips, you can't see issue "beer" anywher.

Conclusion :
Assignee through Category works only once when issue is created.
