<b>Description</b>			
<p>If you search by containing cyrillic uppercase symbols, you get empty result. The query for search looks like</p> <p>when "~"</p> <pre>sql = "LOWER(#{db_table}.#{db_field}) LIKE '%#{self.class.connection.quote_string(value.first.to_s.downcase)}%'"</pre> <p>but ruby function downcase works only with latin symbols.</p> <p>We add special private method:</p> <pre>def like_operator(content)   if Redmine::Database.postgresql?     "LIKE '%#{content}%' "   else     "LIKE LOWER(#{content})"   end end</pre> <p>and override method sql_for_field</p> <p>when "~"</p> <pre>sql = "LOWER(#{db_table}.#{db_field}) #{like_operator(self.class.connection.quote_string(value.first.to_s.downcase))}" when "!~"   sql = "LOWER(#{db_table}.#{db_field}) NOT #{like_operator(self.class.connection.quote_string(value.first.to_s.downcase))}"</pre>

Query doesn't work with non ASCII uppercase symbols (#20438).

#### History

##### #1 - 2015-07-30 01:17 - Toshi MARUYAMA

What db do you use?

If it is SQLite3, it does not work (r13760).
