Redmine - Defect #20440

Colon character on Wiki pages title doesn´t work

2015-07-29 19:22 - Cassiano Monteiro

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Wiki		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	3.0.0

Description

Tried to create a wiki page with the colon character on its title, and it doesn´t render properly, as seen below:

```
h1. Wiki

[[Test with colon :]]

[[Test without colon]]
```

Result:

Wiki

[[Test with colon :]]

Test without colon

Tested on the online demo version 3.0.0.devel.14065.

History

#1 - 2015-07-29 19:23 - Cassiano Monteiro

Forgot to close the "pre" tag:

```
h1. Wiki

[[Test with colon :]]

[[Test without colon]]
```

Result:

Wiki

[[Test with colon :]]

Test without colon

- Description updated

#3 - 2018-03-07 07:15 - Mizuki ISHIKAWA

When using a colon, it is regarded as the following link.

```
[[project:]] -> wiki starting page
[[project:|mytext]]
[[project:mypage]]
[[project:mypage|mytext]]
```

Also, the colon will be removed from the title of the wiki by Wiki.titleize. (That is, you can not use a colon in the wiki's title)
I think it seems difficult to solve this problem...
