Redmine - Defect #20465

MailHandler: ignoring email with Auto-Submitted:auto-generated header

2015-08-03 13:39 - Benoit BRETON

Status:	Needs feedback		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Email receiving		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	3.1.0

Description

I think there's a little bug in the processing file "mail_handler.rb" a line 84.

It should be replaced:

    'Auto-Submitted' => / \ Aauto- (Replied | generated) /,
by
    'Auto-Submitted' => / \ ^ self (Replied | generated) /,

I think I've run in to the same bug with our 3.0.3 instance; mail is definitely being sent for some circumstances, but through some combination of acting through the UI and also responding via direct email replies, the log tail is showing "MailHandler: ignoring email with Auto-Submitted:auto-replied header". I've confirmed this is happening using both local sendmail and Gmail SMTP.

It seems like a workaround might go in app/models/mailer.rb to allow config/settings.yml:mail_from config to override that value to at least allow users to skip the mail_handler.rb validation.

#3 - 2015-12-04 23:31 - Nate Mow

As best I can tell, it looks like once the header has been added, whether by Redmine or by an external mail server (e.g. #16190), Redmine will just skip sending of some emails...data does make it in, attaches to correct ticket, etc. but no notice is happening.
