Description

Dear Team,

I am impressed with the Redmine Project Management software, wanted to check is there an option to highlight the issue tickets or mark them in bold which has latest replies from the users?

Using latest version of Redmine 3.1.0 (2015-07-26)

on Ubuntu 14.04.2 LTS (GNU/Linux 3.13.0-57-generic x86_64)

Thanks,
Ravi
