Description

Can we make a super admin to control rights access for admin section?

History

#1 - 2015-09-04 04:00 - Toshi MARUYAMA

- Status changed from New to Needs feedback

Please describe more details.

#2 - 2024-10-22 20:33 - Holger Just

- Status changed from Needs feedback to Closed

- Resolution set to No feedback

Redmine only has one Administrator level: all users with administrator rights can view and change all data, including any setting in the **Administration** section. Administrators can also set (i.e. add or remove) the Administrator flag on other users. Thus, by marking a user as Administrator, ehty will get the ability to change admin settings.

If this does not answer your question, please add more details and possibly re-open this issue.
