

Redmine - Feature #2051

Code view/pre div width

2008-10-19 13:59 - Christoph Kappel

Resolution:			
Description The width for "pre" is set to 95% and this doesn't work well with enabled TOC. (div.wiki pre/application.css:456) With visible TOC "pre" elements will appear below the TOC and not next to it. My suggestion is to set the width to auto to fix it.			
Related issues: Has duplicate Redmine - Defect #5795: Long wiki TOC and <pre> section breaks ... Closed 2010-07-01			

History

#1 - 2008-10-31 12:57 - Harald Lapp

this bug behaves different on different browsers:

- safari: the code box is positioned above the toc, which is very annoying, because you -- of course -- can't read the toc in this case
- firefox: the code box is pushed down -- which breaks the layout, somehow

i second the suggestion to set the width to 'auto'. this should fix this in both browsers.

#2 - 2009-06-19 16:34 - Christoph Kappel

It can't be to difficult to fix this - I have to change it manually everytime I update Redmine..

#3 - 2011-03-21 20:08 - Matthias Geier

Is there a work-around (without changing the Redmine installation) until this gets fixed?

BTW, I think this one is a duplicate: [#5795](#).

#4 - 2011-03-21 20:17 - Etienne Massip

- Target version set to Candidate for next minor release

Right, thanks.

#5 - 2011-03-27 17:06 - Jean-Philippe Lang

Looks like it was done some time ago in [r3615](#).
Anyone can confirm ?

#6 - 2011-03-28 10:41 - Etienne Massip

Can't reproduce with trunk, indeed.

Matthias, could you please give some more details ?

#7 - 2011-03-29 19:29 - Etienne Massip

- Target version deleted (Candidate for next minor release)

#8 - 2012-10-28 19:04 - Daniel Felix

Well i think, this ticket could be closed too. Doesn't it?

#9 - 2012-10-28 21:49 - Jean-Philippe Lang

- Status changed from New to Closed

Indeed.
