

Redmine - Defect #20556

Redirect to HTTPS

2015-08-18 14:13 - Dennis Olsson

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Website (redmine.org)	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		
Description http://www.redmine.org/account/register and other sensitive pages should (IMHO) redirect to HTTPS when passwords are involved. Even better would be to redirect all traffic, since session cookies are involved and impersonation is trivial if you are in the right/wrong position/place. Adding as a defect since HTTPS is configured on the server.

- Status changed from New to Closed

- Resolution set to Fixed

The server now redirects HTTP traffic to HTTPS.

```
$ curl --head http://www.redmine.org/
HTTP/1.1 302 Found
Cache-Control: no-cache
Content-length: 0
Location: https://www.redmine.org/
```
