Target version:			
Resolution:		Affected version:	

### **Description**

I set maximum attachment size to 5000KB in Settings, since I wanted a maximum of 5MB.

However, the 'new issue' form displays the maximum size as 4.88MB.

I can see three possibilities here:

- 1. The form should say 4.77MiB, but is calculating incorrectly.
- 2. The form should say 5MB.
- 3. The settings field should be relabeled to specify that the maximum file size is in KiB, not KB.

Since I use Linux and OS X, and generally care about how file sizes relate to disk space (which hardware manufacturers measure in base 10), my preference would be for KB/MB/GB throughout.

However, you might want to go with KiB/MiB/GiB for the benefit of Windows users, unless Microsoft has fixed the display of file sizes in Windows 10.

Link for the unconvinced: <a href="http://lpar.ath0.com/2008/07/15/si-unit-prefixes-a-plea-for-sanity/">http://lpar.ath0.com/2008/07/15/si-unit-prefixes-a-plea-for-sanity/</a>>

### **History**

#### #1 - 2015-09-13 08:36 - Jens Krämer

1MB is 1024KB, so 5000KB is 4.88MB, isn't it?

Edit: And yes, I'm one of those who refuse to call their Megabytes Mebibytes;)

#### #2 - 2015-09-14 18:54 - mathew murphy

Being deliberately confusing should not be the default.
