Redmine - Feature #20688
Add Total estimated hours column on issue list
2015-09-07 12:07 - Sebastian Paluch

Status: Closed
Priority: High
Assignee: Jean-Philippe Lang
Category: Issues
Target version: 3.1.1
Resolution: Fixed

Description

Due to the change in r14272 estimated_hours are now independent for parent and subtasks. Total hours for parent are now available through new total_estimated_hours field.

This resulted in a change in what is shown on issue list in column Estimated hours. Before the change, the column shown total estimated hours. Now it is showing nothing.

I decided to report this as a bug as this has introduced big back compatibility issue. Now we are not able to generate overview at higher level of parent tasks.

To fix this situation a "Total estimated hours" column should be added.

I need to be added new REST tag such as "total_hours" instead of "spent_hours". However, I resolved by how the client tools calculate total hours using "spent_hours" after upgrade to 3.1. So, it's not so urgent.

Could you create new issue if you need?
