Resolution:			

Description

There is feature for [Referencing issues in commit messages](#).

Let's say I'd like to add some [properties](#) during repository creation to highlight the issue's URL or keywords from above feature in TortoiseSVN commit dialogue window in log message.

To achieve result as on picture above I need to set such changes in my working copy and commit changes:
- svn propset bugtraq:url "http://redmine.com/issues/%BUGID%" .
- svn propset bugtraq:logregex "([Rr]efs #\d+)|([Ff]ixes #\d+) (\d+)"
There should be extra option in reposman.rb to accept new optional argument, say **--propset**. This argument have to point to text file with properties defined.
Then we execute:

```
ruby reposman.rb --redmine my.redmine.host \
--svn-dir /var/svn --owner www-data \
--url http://my.svn.server/svn/ \
--key=my_api_key \
--propset /root/repositorysettings.txt
```

and /root/repositorysettings.txt contains:

```
bugtraq:url "http://redmine.com/issues/%BUGID%" .
bugtraq:logregex "([Rr]efs #\d+)|([Ff]ixes #\d+) (\d+)"
```

History

#1 - 2015-10-07 04:30 - Toshi MARUYAMA

- Description updated

#2 - 2015-10-07 04:35 - Toshi MARUYAMA

- Subject changed from Ability to set properties during repository creation to Ability to set properties during repository creation (SVN reposman)

- Category changed from SCM to SCM extra
