

## Redmine - Feature #2069

### Wiki syntax to link to files in the files-module

2008-10-22 21:22 - Chad Metcalf

<b>Status:</b> New	<b>Start date:</b> 2008-10-22
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Text formatting	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b> Unplanned backlogs	
<b>Resolution:</b>	
<b>Description</b>	
We'd like to use the wiki page the version creates to talk about what is in the version and then link to the files there so people don't have to then go to the files tab.	
files:fileName for example.

### History

#### #1 - 2008-10-22 21:49 - Mischa The Evil

Additional:

this FR exists due to the known limitation of the syntax attachment link-handler that only can be used to reference attachments of the **current** object as documented in the [detailed syntax description](#).

#### #2 - 2008-10-23 09:39 - aruna sarikonda

- % Done changed from 0 to 50

#### #3 - 2008-10-23 09:39 - aruna sarikonda

- % Done changed from 50 to 0

#### #4 - 2009-05-16 12:56 - Yuval Hager

bumping. I find it rather limiting that files cannot be attached from other areas.

#### #5 - 2010-04-08 19:16 - Jose Luna

+1, We would also find this very useful. I think it would need to be done by filename instead of id, but it seems pretty simple to implement.

#### #6 - 2010-07-14 16:58 - Tkachenko Sergey

+1 we need it

#### #7 - 2010-08-13 08:02 - Lars Erik Gullerud

+1. We currently need to paste full URLs to the object to get this functionality, but it would reduce maintenance quite a bit if one could link directly to objects in the files module.

**#8 - 2010-12-15 14:50 - Yaroslav Matsera**

+1 I need it too

**#9 - 2010-12-15 17:07 - Terence Mill**

You can use some mixed syntax like :

"Download patch":/attachments/download/18

Result : [Download patch](#)

**#14 - 2012-05-14 14:30 - Stanislav German-Evtushenko**

+1

**#15 - 2012-05-14 14:40 - Stanislav German-Evtushenko**

duplicates #543

**#16 - 2012-12-04 21:12 - Andriy Lesyuk**

WikiNG now supports file#<id> and file:<name>. See: <http://projects.andriylesyuk.com/projects/wiking>

**#17 - 2013-03-17 05:44 - Mischa The Evil**

- Target version set to Unplanned backlogs

Is it possible to download file from remote file server?

I tried to make a wiki links like this on version 2.2.3 but it doesn't work.

"Link text":file://127.0.0.1/Shared/file.txt

"Link text":file:///127.0.0.1/Shared/file.txt

Anyone please help.

"file://somehost/dir/file" is "Windows + Internet Explorer" related stuff and not general.

It's been 8 years since this issue was first referenced. I am not a ruby programmer, but is this THAT difficult to perform?

#### #25 - 2017-09-17 02:07 - Mischa The Evil

- File *rm2069.patch* added

Here's a (preliminary, not-well tested) patch (taken from SVN), which I extracted from Andriy Lesyuk's [WikiNG](#) plugin, implementing this feature for the current trunk at r16970. It is not complete yet, though. Todo:

- add tests;
- test filenames with spaces surrounded by quotes;
- test interproject file links.
