

Redmine - Defect #2070

Localization for permission names

2008-10-22 21:31 - Daniel Vandersluis

Status:	Closed	Start date:	2008-10-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:	0.8	Affected version:	0.7.3
Resolution:	Fixed		
Description			
Permission names aren't being localized. It can probably be fixed rather simply without breaking current functionality (see the attached patch for an example, although maybe permission lang strings should be prefaced by "permission_" or something to ensure that if a GLoc key exists, it's for the permission).			

Associated revisions

Revision 1943 - 2008-10-24 17:24 - Jean-Philippe Lang

Makes permission screens localized (#2070).

History

#1 - 2008-10-24 17:20 - Jean-Philippe Lang

- *Category changed from Permissions and roles to UI*
- *Status changed from New to Closed*
- *Target version set to 0.8*
- *Resolution set to Fixed*

Permission screens are now localized ([r1943](#)).
Permission strings are prefixed with permission_ as proposed.
Thanks.
