**Description**

It would be nice to have an option to send email updates, not just when news messages are posted but also when comments are added.

(Just like reply comments to any forum messages can be optionally notified by email.)

Revision 5003 - 2011-03-04 15:32 - Jean-Philippe Lang

Adds email notifications support for news comments (#2074).

**History**

### #1 - 2008-10-23 11:24 - Karl Heinz Marbaise

Hi there,

you can activate that in Administration -> Settings there you have the chance to activate a checkbox:

- Select actions for which email notifications should be sent.
- Issue added
- Issue updated
- News added
- Document added
- File added
- Message added

Or did you mean something different?

Kind Regards

Karl Heinz Marbaise

Hi Karl,

Thanks for the super quick response.

All boxes are checked, but email notifications aren't sent when comments are added to news tickets. I'm filing this because I'm not sure if it is a bug or a feature that hasn't been implemented.
#3 - 2008-11-28 11:37 - Ian Fieldhouse

I'm also not being notified of any comments made on news items. As with Yoshi, all the checkboxes are ticked in my install. It's not a dealbreaker, but it would be a nice feature to have.

Is it possible to change the actions shown in the "Email notifications setting"; remove an action or add another one? And if possible, how (I am new with Redmine)?

Thanks,

Any update on the likelihood of this feature?

We're trying to make more use of the News feature internally, and it'd be very helpful to receive notifications when someone has commented on news ticket I've posted, or responded to a comment I've made on a news item.

This was something I thought was built-in as well...I just started using Redmine here for a new project at the college where I need to work with staff from the different divisions and one of the first things that they tried to do was comment on the news item I wrote, which was a summary of our meeting from last week. Luckily I noticed that a comment was made and was able to reply to it, but I did not receive any notice in my inbox that a comment was made.

After turning on all of the available notifications in Redmine's settings area, I am still not receiving any comment notifications and after reading this issue it does not seem like something that is currently implemented, but it sure would be useful :-).

Has there been any work done on this yet? It still appears to be a missing feature (or is it just broken)?

#8 - 2010-11-16 21:25 - Jean-Philippe Lang

- Subject changed from Sending email updates when comments are added in the news section to Sending email notifications when comments are
We even don’t get emails if a new News message is committed. Nice to have that for comments on them also, but what is wrong with our setup? Checkbox mail on “News added” in Administartion Config is set.

Support for mail notifications on news comments added in r5003.
It must be enabled in Application settings -> Mail notification.

Is there any way to be notified about news, without enabling notification for all changes in project?
For us the usual use case is, that someone want to select if you wanna get notified for changes in every separate content type. Means:
- issues changes itself (all changes on field of ticket itself)
- journal changes on issues, aka comments
- documents
- files
- wiki
  - wiki comments
- board threads
- Roadmap changes (issue added or removed from version, fields on version changed, version added)
- changesets (news added or changed)
  - comments on news

Notification delivery immediately, daily, weekly. Configure many sets as pair of content type and delivery period, eg. issue changes immediately, roadmap and news changes weekly.
