Redmine - Defect #20799

Incorrect language when set to Portuguese Brazilian

2015-09-21 17:53 - Fernando Possebon

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	I18n		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Cant reproduce		**Affected version:**	3.1.1

Description

I'm using the Redmine 3.1.1 version and when I set the default language or the user language preference to Portuguese Brazilian, the Redmine loads the Portuguese language.

I looked at database on settings table, to check if the information was written correct there, and there is stored the value pt-BR.

I looked at config/locales folders and there is a pt-BR.yml file there, with all values.

I did a test: renamed the pt.yml (Portuguese Portugal) and restarted the Redmine application. After the rename, Redmine starts in English.

That's means that even the language is set to pt-BR, Redmine looks for the pt.yml file.

History

Toshi, I did what you suggest and the behavior is the same. Still uses the pt.yml

#4 - 2015-10-20 04:13 - Toshi MARUYAMA

Did you try #2691?
