Redmine - Feature #20800

Add "issue name" when listing time_entrise or getting a time_entry by REST API

2015-09-22 05:34 -

Category:	REST API		**Estimated time:**	0.00 hour
Target version:				
Resolution:				

Description

when **listing time_entries** or **getting a time_entry** by REST API, the issue name won't show.

for example:

```
GET /time_entries.xml

<time_entry>
<id>4</id>
<project id="3" name="project"/>
<issue id="4"/>
<user id="127" name="username"/>
<activity id="9" name="design"/>
<hours>1.0</hours>
<comments>none</comments>
<spent_on>2015-09-22</spent_on>
<created_on>2015-09-22T01:40:26Z</created_on>
<updated_on>2015-09-22T01:40:26Z</updated_on>
</time_entry>
```

It would be nice to add the issue name in REST API, in this way, we needn't call another API to get the issue name.

History

#1 - 2018-03-05 11:53 - Francesco Abeni

- File issueName.patch added

The attached patch adds issue subject to **time_entries** index.

Tested on Redmine 3.2 but it should be ok on 3.3 and 3.4 as well.

#2 - 2019-06-23 23:43 - Maxim Krušina

Plz can we merge it into stable?
