<b>Target version:</b>			
<b>Resolution:</b>	Invalid		
<b>Description</b>			
Email notifications of private issues shouldn't be sent to all project members			

#### History

##### #1 - 2015-10-21 11:26 - Toshi MARUYAMA

- Subject changed from Private issue notifications to No private issue notifications

##### #2 - 2015-10-21 11:29 - Toshi MARUYAMA

- Tracker changed from Patch to Feature

##### #3 - 2015-10-21 11:35 - Toshi MARUYAMA

Sorry, I cannot get your intention.

Your patch send mail to assignee, right?

Your patch change behavior.

I think it is better to add checkbox on issue form such as ChiliProject.

<https://www.chiliproject.org/issues/310>

##### #4 - 2015-10-21 15:53 - Karel Pičman

My intention is related to **PRIVATE** issues only. While private issues are hidden to the project members except the author and the assignee, the email notifications are distributed to all project members. And that's wrong, I think.

It is not true.

Private issue visibility can be defined at role "Issues visibility".

##### #6 - 2015-10-22 12:04 - Karel Pičman

You're right. From that perspective my patch is wrong. However, the problem persists. In case of an update of a private issue, all members of the project get notifications despite the fact they are not allowed to view the issue.

##### #7 - 2015-10-22 12:19 - Karel Pičman

- Status changed from New to Resolved

I see it now. That's a complete misunderstanding from my site. Sorry for your time. You can close it as *Invalid*.

all members of the project get notifications despite the fact they are not allowed to view the issue.

Really?

<source:tags/3.1.1/app/models/issue.rb#L889>

```
# Remove users that can not view the issue
notified.reject! {|user| !visible?(user)}
```

#### #9 - 2015-10-22 12:23 - Toshi MARUYAMA

- *Status changed from Resolved to Closed*
- *Resolution set to Invalid*

Thank you.
